

CAN Autism

Presented by: Canucks Autism Network

This interactive training workshop provides an overview of the characteristics of autism and a range of practical tools to support positive behaviour in recreation settings. Participants will be introduced to strategies to enhance communication, increase predictability and structure, use visual supports, increase motivation and positive behaviour, and provide support during difficult situations..

This is presented by Canucks Autism Network (CAN) who provides programs for individuals on the autism spectrum and their families, while promoting acceptance and inclusion through community engagement and training initiatives across BC and beyond.

From Surviving to Thriving:

Understanding Big Emotions and Behaviours

Presented by Ana Valle Rivera

Parenting and caregiving for young children can be overwhelming, especially when faced with big emotions and puzzling behaviors. Join Ana in this two-hour workshop,

"From Surviving to Thriving: Understanding Big Emotions and Behaviors," created for parents and caregivers of young children.

In this concise and informative session, you'll get Q&A time with Ana to ask questions about child development, while also gaining valuable insights into the world of little ones. In this session, you will learn reflective and practical strategies to navigate this challenging phase of life.

Ana is a proud mother of three, a public speaker, a consultant, and the founder of Early Years Thriving. Since 2007 through her passion for teaching, Ana has facilitated hundreds of educational workshops for thousands of ECEs, teachers, caregivers, and parents. Ana has a background in ECE, a Bachelor's Degree in Child and Youth Care, and she is

Spring Make 'n Take

Get your creative juices flowing. Come and join us for a fun interactive workshop. You will create a sensory bag using a variety of materials. These Sensory Bags offer children the ability to feel different textures with their hands, feet or body through tactile exploration. Exploring tactile sensations helps build neural pathways for self-regulation and learning readiness in children.
